## **Ipod Docking Station User's Manual**

Connect your iPod to your  
home stereo in high fidelity

To start a slideshow go to:

- Photos > choose photo selection > thumbnails will appear on your iPod Screen > press play on your iPod > your iPod screen will change to Slideshow Mode with a play triangle in the top left-hand corner
- Drop your iPod into the iPod docking station
- You should see a photo on your TV and also hear music playing
- Use the remote ►► and ◀◀ keys to cycle through your photos
- To shut down your iPod hit the ►► button on the remote for 3 seconds
- To resume slide show hit the ►► button on the remote

Note: When switched off, some versions of iPod continue to send the last photo to your TV even though the iPod screen goes into battery charging mode. We recommended you manually turn off your iPod via the click wheel if your iPod model does this.

Note: Pressing the ▼ or ▲ buttons on the remote control during a Slideshow will end your session and revert your iPod back to its music play mode.

#### **Automatic Slideshow with music**

To set up your iPod go to:

- Photos > Slideshow Settings > Time per Slide > select a time  
> Music > choose the music you want to hear  
> TV out > on  
> TV Signal > Set to your country's TV standard

To start a Slideshow go to:

- Photos > choose photo selection > thumbnails will appear on your iPod
- Screen > press play on your iPod > your iPod screen will change to Slideshow mode with a play triangle in the top left-hand corner
- Drop your iPod into the iPod docking station
- Use the remote ►► and ◀◀ keys to skip through photos
- Press ►► on the remote: music and slide show stops-hold for 3 seconds to turn your iPod off
- Press ►► to start slide show again

Note: When switched off, some versions of iPod continue to send the last photo to your TV even though the iPod screen goes into battery charging mode. We recommended you manually turn off your iPod via the click wheel if your iPod model does this.

Note: Pressing the ▼ or ▲ buttons on the remote control during a Slideshow will end your session and revert your iPod back to its music play mode.

## Step 6: Using the remote

Even when your iPod is docked, you can still use the scroll wheel to control all functions.

The remote control lets you:

- ▶▶ Skip to next track
- ◀◀ Skip to previous track
- ▶| Press to play, press to pause
- ▲ Choose next playlist
- ▼ Choose previous play list

RND	Random	Random to play iPod tracks (only enabled in iPod mode)
RPT	Repeat	Repeat iPod music by 1 track, all tracks, or repeat function is disabled (only enabled in iPod mode)
Menu	iPod Menu set	Turn to iPod Menu setting (only enabled in iPod mode)
↑	Upwards menu set	Turn to iPod upwards menu setting (only enabled in iPod mode)
↓	Downwards menu set	Turn to iPod downwards menu setting (only enabled in iPod mode)
↵	Confirm Menu set	Confirm your iPod menu item (only enabled in iPod mode)

When your iPod receives a remote control command, the display will light up.

## Step 7: Turning your iPod on and off

To turn your iPod off, press and hold pause. After 3 seconds the iPod docking station will turn your iPod off.

To turn your iPod on, press play. Your iPod will resume playback.

## Step 8: Recharging your iPod

The iPod docking station recharges your iPod when playing music through your home stereo.

The iPod docking station also recharges your iPod when it is switched off and placed into the dock.

Use the iPod docking station to charge your iPod any time.

## Step 9: Photo slideshow

### Manual Slideshow with music

To set up your iPod go to:

- photo > Slideshow Settings > Time per Slide > Manual
  - >Music > choose the music you want to hear
  - >TV Out> On
  - >TV Signal > Set to your country's TV standard

## Step 1: What's in the box?

- \* iPod docking station
- \* Remote control
- \* Power adapter
- \* RCA audio L+R and video cable
- \* Audio adapter cable
- \* 5 dock adapter inserts
- \* User manual

## Step 2: Getting started

Select the right dock adapter inserts and insert it into dock.

### Step 3: Connecting your stereo

#### Audio

Find the audio inputs on your stereo. These may be called Aux, Line In, Tape play, CD In, MD In, etc.

Plug the red and white ends of the included RCA cable into the red and white jacks on your stereo.

Plug the red and white ends of the included RCA cable into the red and white jacks on your iPod docking station.

Plug the power adapter into the back of your iPod docking station.

#### Video

**Note:** Video output only works with iPods that support photo and video viewing.

If you want to view photos or video on your TV, plug the yellow end of the included RCA cable into the yellow video input on your TV or surround sound receiver.

Plug the other end of the video cable into the yellow video jack on your iPod docking station.

### Step 4: Play some music

Before docking your iPod, make sure you have your stereo turned down.

On your iPod, choose the music you want to hear and start it playing.

You don't need to worry about the volume you have your iPod set at.

Most music through your home stereo will sound better with the iPod equalizer turned off or set flat.

Pop your iPod into the iPod docking station.

Raise your stereo to a comfortable listening level.

**Note:** Because the iPod docking station outputs a high fidelity, line-level signal, you need to use the volume control on your home stereo to adjust the volume. Your iPod docking station operates exactly the same as a high-end CD or DVD player for the best possible audio quality.

### Step 5: Adjusting the level of TruBass

On the right side of your iPod docking station is the TruBass knob.

Move the knob forward to increase the level of TruBass.

Adjust so that it adds depth and makes your music sound warmer.

To totally bypass TruBass, move the knob backward until you feel it click.

TruBass sounds better with the iPod equalizer turned off or set flat.

You usually need to set the level of TruBass only once to get great results through your stereo.
